  - Integrated mapping tools are easy to use
- (Planned) Accepts inquiries to the Fire Prevention Bureau via the SDL Municipal Portal

## One module within a complete Municipal Management Suite

Fire Prevention Bureaus are charged with the enforcement of the Uniform Fire Code of the State of NJ. This responsibility calls for periodic inspections of commercial, health care, restaurants, businesses and schools. Scheduling the inspections, recording results, issuing licenses and violations are functions that can be conducted more efficiently with automation. Daily, weekly and monthly reminders and reports will enable maximum efficiency and success.

SDL believes that Fire Prevention Departments are actually service organizations that operate within a network of departments that have a greater purpose. That purpose is to serve and protect the citizens of their community. To effectively operate within a network, you must be able to communicate with the other members, interact with them, see what they are doing and share data with them. Now you can with the Professional Series of Workflow Automation tools from Spatial Data Logic.
