

# Manager Module

## Software for the Town Manager and Administration

- Prepare reports summarizing specific or all municipal activity for a given time period
- Analyze trends in your data between departments and over time
- Track all municipal complaints, their status, the type, the location and the amount of time that it takes for closure
- Holistic and historic view of every municipal property

The screenshot displays the Township Manager software interface. It includes a map search window on the left, a property summary window showing details for a property owned by WENG, JOHN & PEGGY LIAO, and a monthly report window for the period 10/5/2008 to 11/5/2008. The report includes sections for Building Pro Applications and Building Pro Inspections. A report options dialog is also visible, allowing users to select departments and dates for the report.

## One module within a complete Municipal Management Suite

Were you ever caught scrambling for information right before a Council Meeting? Have you ever needed specific data but could not get your hands on it because a key individual was on vacation?

Now you can take report generation and activity analysis into your own hands with the Municipal Manager Module. You can generate reports for a single department, any group of departments, or all of them together. Every complaint logged within GeoLogic is at your fingertips for status lookup, sorting by date, status, type, or the responsible individual.
