Spatial Data Logic
The Total Solution for Municipal Management
WWW.SPATIALDATALOGIC.COM
One Platform for All

SDL Municipal Management Software is a premier municipal management platform that helps local governments unite and automate departments, workflows and functions. With a robust geographic information system (GIS) at its core, SDL features:

• Cloud-based, web-based and desktop applications
• Engineered to meet stringent regulations of local governments
• Interdepartmental suite of modules to track files and activity
• Ease-of-use for officials, employees and citizens
Why SDL? More than a management system, SDL is the total package.

**IT'S A CITY-WIDE SOLUTION**
- Applications, licenses, permits and work orders
- Property-based for easy interdepartmental access
- OPRA and Complaint Management functions

**IT'S A CITIZEN ENGAGEMENT TOOL**
- Available online 24-7-365
- Accessible online forms and applications
- Automated and real-time notifications
- Reduces phone calls and inquiries

**IT'S A WORKFORCE MOBILIZER**
- Native app with offline access
- Mobile printing and email to citizens
- More time in the field, less in the office

**IT'S A SECURE ALTERNATIVE**
- Desktop interaction on premises
- Hybrid cloud solution
- Municipalities own the data on their network
Platforms Accessible and fully-synced whenever and however you need it - anytime, anywhere, instantly.
