MANAGEMENT  
SOFTWARE

SPATIAL DATA LOGIC

# Fire Prevention

Plan for and address safety concerns with ease

## Why SDL

Spatial Data Logic's Municipal Management Software helps bridge the gap between municipalities and their constituents by providing visibility across departments, streamlining workflow for staff and enabling self-service access for residents.

Our Fire Prevention Module is designed to help staff manage inspections, address safety concerns, pre-plan for emergencies and reference codes to ensure compliance is being met throughout the town.

## How We Help

### STREAMLINE TASKS

Easily process, track and view inspections, registrations, certificates, permits, violations and complaints

### PRE-PLAN TOOLS

Record pre-plan information by parcel and provide access to fire department

### FIELD ACCESSIBILITY

Access records, view GIS maps, reference codes, complete reports and submit pictures while onsite

### EMPOWER RESIDENTS

Submit inspection requests, access records and report concerns online

### COLLABORATION

SDL modules work together to provide a comprehensive view of property history allowing staff to access information and collaborate across departments

### ENSURE COMPLIANCE

Reference codes, ordinances and policies

Innovative  
partnership  
with ICC

1 Million +  
inspections  
completed via  
SDL Mobile

"SDL has greatly  
improved our  
fire inspection  
efficiency."
