

# SDL

MUNICIPAL  
MANAGEMENT  
SOFTWARE

SPATIAL DATA LOGIC

# Public Works

Tackle maintenance and improvement projects with ease

## Why SDL

Spatial Data Logic's Municipal Management Software helps bridge the gap between municipalities and their constituents by providing visibility across departments, streamlining workflow for staff and enabling self-service access for residents.

Our Public Works Module is designed to help staff complete tasks, schedule labor, track resources and note upcoming maintenance work.

## How We Help

### STREAMLINE TASKS

Address service requests, complaints, work orders and inspections. Access via desktop, tablet or mobile device

### RESOURCE MANAGEMENT

Schedule personnel and track man-power, equipment, vehicles, routes and materials

### GIS MAPPING

Access town and parcel information on-the-go. Ability to map and search the location of items such as speed bumps, electrical boxes, trees, signs, etc...

### KEEP MUNICIPALITY INFORMED

Log upcoming service requests and road openings to inform municipality of any impacted areas

### STATE OF EMERGENCY

Document labor and resources used due to state of emergency to submit for FEMA reimbursement

### STORM WATER MANAGEMENT

Complete debris removal, conduct outfall inspections, clean inlets and categorize storm control areas
