assets such as:

- Water Valves
- Hydrants
- Storage Tanks
- Mains
- Pipes
- Manholes
- Pump stations
- Treatment facilities
- Wells
- Grease traps

Why SDL

Spatial Data Logic's Municipal Management Software helps bridge the gap between municipalities and their constituents by providing visibility across departments, streamlining workflow for staff and enabling self-service access for residents.

Our Utility modules are designed to help water and sewage personnel manage resources and streamline tasks whether they are on-the-go or at their desk.

How We Help

STREAMLINE TASKS

Manage assets, service requests, complaints and inspections

RESOURCE MANAGEMENT

Schedule crew, track equipment and view upcoming maintenance needs for equipment

WATER SOLUTIONS

SDL's water module also helps staff conduct tests, complete inspections, treat water, manage water meter change outs and aid in conservation efforts

SEWER SOLUTIONS

SDL's Sewer Module assists staff in delivering high quality, cost effective and safe public infrastructures and facilities

VEHICLE & ROUTE TRACKING
