

SDL

MUNICIPAL
MANAGEMENT
SOFTWARE

SPATIAL DATA LOGIC

Clerk & Licensing

Address the needs of your residents with ease

Why SDL

At Spatial Data Logic (SDL), we recognize the need for quick access to accurate information. For over 20 years, our municipal management software has helped bridge the gap between municipalities and their constituents by providing visibility across departments, streamlining workflow for staff and enabling self-service access for residents.

Our software provides searchable access to department information to help the Clerk's office maintain records, address complaints and process requests quickly.

How We Help

OPRA MANAGEMENT

Track the status, department assignment, location and closure time for OPRA requests

COLLABORATION

Assign tasks, access information and work in tandem with other departments

COMPLETE RECORDS

SDL modules work together to provide a comprehensive view of property history by department and parcel. Access GIS map linked to parcel information

CITIZEN ENGAGEMENT

Empower residents to submit requests, access records and report concerns online.

STREAMLINE TASKS

Manage and issue applications, permits and licenses (Liquor, taxi, mercantile, parking, games of chance, etc.)

MAINTAIN CONTACTS

Create and maintain contact information & terms for municipal board members

160+
New Jersey
clients served

40% decrease in
OPRA requests
after enabling
citizen platforms

Building Dept. – Union County, NJ

“SDL has not
only cut down
on foot traffic,
phone calls, and
OPRA requests,
but has also
strengthened
the Township's
relationship
with our
community.”

Clerk's Office – Tom's River, NJ
