Why SDL

Spatial Data Logic's Municipal Management Software helps bridge the gap between municipalities and their constituents by providing visibility across departments, streamlining workflow for staff and enabling self-service access for residents.

SDL's Engineering Module is designed to help staff map and track upcoming projects while collaborating with other departments to ensure local ordinances, regulations and specifications are being adhered to.

How We Help

STREAMLINE TASKS
Review construction plans, manage projects and process permits, inspections, applications and certificates

GIS MAPPING
Link road openings, service requests and other projects to your municipal map. Plot extents and area measurements

200 FOOT OFFSETS
Determine adjacent properties for notification and generate mailing labels

MANAGE RESOURCES
Assign man hours, equipment and materials to projects

COLLABORATION
SDL modules work together to provide a comprehensive view of property history allowing staff to access information and collaborate across departments

RECEIVE NOTIFICATIONS
Set alerts for approaching application review dates and email prompts to notify departments of status changes
