SDL
MUNICIPAL
MANAGEMENT
SOFTWARE

SPATIAL DATA LOGIC

Tax Assessor
Stay informed on property changes

Why SDL

For over 20 years, Spatial Data Logic's municipal management software has helped bridge the gap between municipalities and their constituents by providing visibility across departments, streamlining workflow for staff and enabling self-service access for residents.

Our Assessment Module is designed to help staff monitor development status, identify properties for reassessment and track property changes.

How We Help

STAY INFORMED
Access construction permits and track final inspection dates to prioritize properties for reassessment

MOD-IV TAX DATA
Import MOD-IV tax data from your current system. Access data with an easy to use interface for sorting, grouping and searching specific properties

COLLABORATION
MOD-IV data syncs with other department modules to provide the most up-to-date property owner information

ADDITIONAL LOTS
Link additional lots to "lead parcel" for easy access and billing

GIS MAPPING
Town map linked to property information, tax data and documents for quick parcel history. Overlay layers such as land value and building type for additional views

160+
New Jersey clients served

20+ years of municipal experience
